

Precision mail insertion and faster job changeover.

You can't afford a mistake when it comes to sensitive data. Line Scan Systems improve speed, compliance, and flexibility by inserting mail accurately and securely.

Videk Line Scan Systems read a code anywhere on the page

PRODUCTIVITY

More uptime per job.
No need to move cameras between jobs, making changeovers fast.

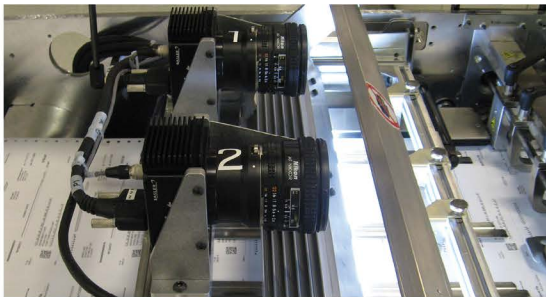

FLEXIBILITY

Adapt, scan, analyze, repeat.
Perfect for a wide variety of layouts so you can scan and validate any customer job.

SECURITY

Protect customers, automatically. Monitor and track every piece of sensitive information.

Videk Line Scan Systems for BlueCrest Epic and Pulse™ Inserters

Integration with BlueCrest Direct Connect® eliminates the need for operator intervention.

Secure tracking for critical mail components

Specifications

Input or Output Scanning:

Code Class	Code Types	Requirements	Input Scanning: Code Size	Output Scanning: Code Size
2D Barcode	Data Matrix QR (Mode 2)	Meets ECC 200 specs Versions 1, 2 or 3	Performance by Cell Size Excellent: $\geq .020''$ Good: $\geq .017''$	Performance by Cell Size Excellent: $\geq .012''$ Good: $\geq .010''$
1D Barcode	Code 39 2 of 5 Code 128 EAN13 EAN18 UPCA IMB	Min Vert Clear Zone: $.100''$ Min Horiz Clear Zone: $.300''$ Ladder or Picket Fence	Performance by Bar/Space Width Excellent: $\geq .020''$ Good: $\geq .015''$	Performance by Bar/Space Width Excellent: $\geq .010''$ Good: $\geq .007''$
Text	OCRA OCRB MICR Other Fonts	Max String Length: 120 characters	Performance by Font Size Excellent: ≥ 10 pt Good: ≥ 8 pt	Performance by Font Size Excellent: ≥ 8 pt Good: ≥ 6 pt
OMR	Ladder or Picket Fence	Min Vert Clear Zone: $.100''$ Min Horiz Clear Zone: $.300''$ Start Bar (benchmark) in every row	Min Bar Thickness: $.015''$ Min Bar Spacing: $.045''$	Min Bar Thickness: $.008''$ Min Bar Spacing: $.024''$

PRINT AND MAIL EXECUTIVES ARE SAYING:

“ We were able to easily transform from cumbersome barcode scanners and area array cameras to intelligent line scan systems with immediate gains in productivity.

We can now view the entire page during the job. There is no need to make hardware adjustments between jobs since the system doesn't care where the control code is placed.”

Boost security even further with the Line Scan System for Windowed Envelope Verification

- Reads codes for job tracking and audit
- Provides Personal Information Security
- Confirms the right envelope is used for the right job
